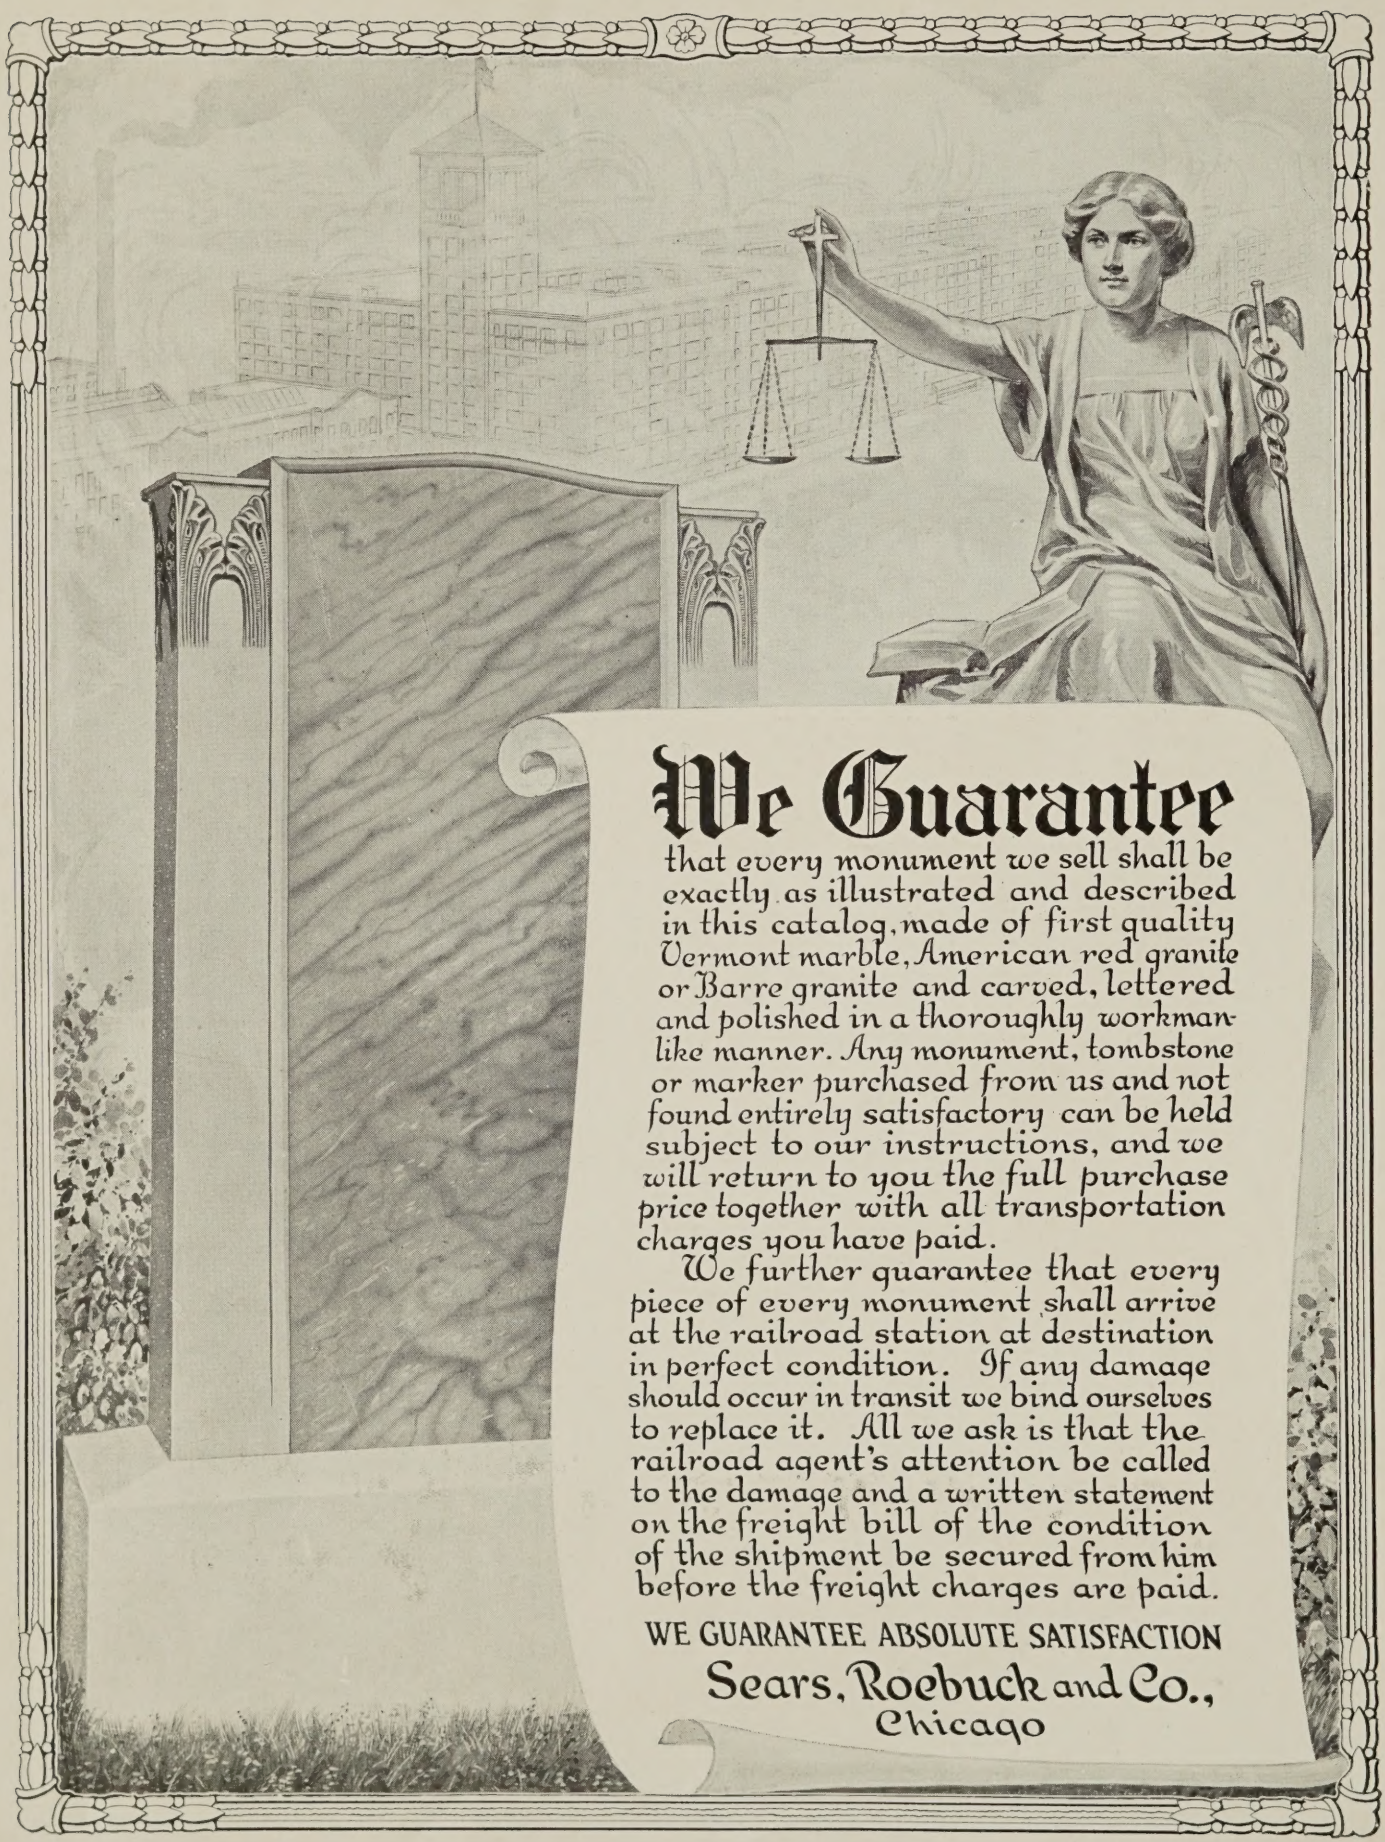
MONUMENTS
TOMBSTONES
MARKERS

SEARS, ROEBUCK AND CO.
CHICAGO



We Guarantee

that every monument we sell shall be exactly as illustrated and described in this catalog, made of first quality Vermont marble, American red granite or Barre granite and carved, lettered and polished in a thoroughly workmanlike manner. Any monument, tombstone or marker purchased from us and not found entirely satisfactory can be held subject to our instructions, and we will return to you the full purchase price together with all transportation charges you have paid.

We further guarantee that every piece of every monument shall arrive at the railroad station at destination in perfect condition. If any damage should occur in transit we bind ourselves to replace it. All we ask is that the railroad agent's attention be called to the damage and a written statement on the freight bill of the condition of the shipment be secured from him before the freight charges are paid.

WE GUARANTEE ABSOLUTE SATISFACTION

"Fear not that ye have died for naught.
The torch ye threw to us we caught.
Ten million hands will hold it high,
And Freedom's light shall never die!
We've learned the lesson that ye taught
In Flanders fields."
JOHN B. LANGLEY
6TH REGT. U.S.M.C.
AT BELLEAU WOODS
1885 1918

E HAVE shipped monuments and tombstones into every state in the Union, into almost every county, since our Monument Department has been in existence. Many letters received from our customers assure us that "the stone received from you is the finest stone in the cemetery," and that our customers have saved a large amount over what they would have had to pay elsewhere.

This general satisfaction is due in large measure to the fact that each stone is carefully inspected at our shops before being finished and engraved. We never permit a single piece of inferior marble or granite to be shipped to our customers, Then, too, our prices are based on the cost of the finished stones at our shops, located right at the quarries. The stones are thus made up with the least possible expense in handling, and are then shipped direct to you. Compared to the freight rates charged on other classes of merchandise the rates on monuments are quite reasonable, as you will see from the rates to different states given on the inside back cover page of this book.

You will find in this catalog a large variety of stones to select from. We have included a number of beautiful selections which are especially appropriate for military memorials.

The popular acceptance of the cenotaph (a memorial erected at home to the honor of a soldier whose remains still rest in foreign lands) has fittingly solved a problem which has deeply concerned those whose dear ones have made the great sacrifice in the recent war. Many such memorials have already been erected in this country and many more are now being put up.

Remember that we are anxious to co-operate with you in every way to help you select a stone that pleases you. We can furnish any of the stones listed in this catalog with any special carving you have in mind. Carved emblems or decorative designs can be changed to suit your taste. Our monument department will, upon request, cheerfully submit estimates on special work of this kind. Therefore, if you find a monument which you like, but which has a design on it not just according to your ideas, bear in mind that this need not prevent you from selecting that particular stone, as we can in most cases change the emblem or decoration to suit your taste.

Whether you purchase the largest and most expensive monument in this catalog or the smallest grave marker, you can depend upon it that your order will be carefully executed.

We have the equipment, the source of supply and the organization to give you the kind of service you have a right to expect, and you can place your order for any monument, tombstone or marker in this catalog with a feeling of confidence that you will receive a stone that is equal to the best on the market and perfect beyond criticism in workmanship, finish and material. You are protected by our liberal guarantee of absolute satisfaction.

Marble tombstones and monuments are described on pages 41 to 78. Two beautiful selections of imported marble statuary are shown on pages 44 and 45. American red granite stones are illustrated and described on pages 28 to 40. Barre granite stones are shown on pages 3 to 27.

Many people wish to purchase stones without any lettering whatever, while others specify considerable lettering. In order to be fair to all, we have quoted prices in this catalog for the stones without lettering. If lettering is desired give a clear and exact copy of just what is wanted. When sending your order specify style, etc., and allow for the extra cost as explained on pages 80 and 81.

It is very important to give clear and exact instructions with reference to lettering, especially as to spelling of names, etc. Corrections cannot be made after the stone is once cut. Our prices for lettering are very reasonable and the work is executed with the utmost care. In fact, we take care of everything except the hauling and erecting. A selection of military verses and emblems will be found on pages 82 and 83. Fraternal emblems are shown on page 84 and a wide selection of epitaphs will be found on page 79. Full directions for erecting are given on pages 86 and 87.

Our Guarantee

ON the inside front cover page of this catalog you will find a clear, straightforward statement of our guarantee, under which every monument, tombstone or marker in this catalog is sold.

Your interests are protected absolutely by this guarantee, and all element of risk in the purchase is completely removed.

We guarantee any stone purchased to be perfect beyond question in every particular.

We guarantee that it will reach you in perfect condition and, this is not all, we even go farther and guarantee that you will be perfectly satisfied with your purchase.

If for any reason whatever, you are not entirely pleased with the stone you have purchased, after inspecting it on arrival, you may hold it subject to our instructions and your money will be promptly refunded, together with all transportation charges you have paid.

It is for you to say whether or not your purchase has been satisfactory and we are willing to abide by your decision. You take no chances when you order a stone from us.

We would rather have you return a stone any time than to have you feel that you have made a purchase from SEARS, ROEBUCK AND CO. that does not satisfy you in every respect.

These Are Our Terms

Our terms are cash in advance on all monument orders. At our low prices we cannot profitably sell on any other terms. You will run no risk whatever in sending the full amount in advance, for our guarantee protects you fully.

HURDLAND, MO., Nov. 19, 1918.

SEARS, ROEBUCK AND CO., Chicago, Ill.

Gentlemen:—The monument I purchased from you arrived all O. K. in first class condition and I have placed it in position in the cemetery. I am highly pleased with it and have heard many compliments upon it already. I think you saved us about $100 on this job. We are very grateful to you for the way you handled this order as well as all others we have sent you. We could not wish for more honorable and courteous treatment than we have received from your firm. With sincere thanks I remain, Yours very truly, R. B. SHARP,

Genuine Barre Granite Monuments and Markers

Barre Granite the Standard

THERE are dozens of gray granites quarried in the United States, some of which are used only for paving blocks. Others are used largely for building purposes, but only a few are of good enough quality to use for monuments. Of this last group, the famous Barre granite, quarried at Barre, Vermont, stands out in a class by itself as superior to all others.

Barre granite is the standard by which all other gray granites are measured, and has been in use so long that it is very well known. Barre granite has proved to be perfectly satisfactory to hundreds of thousands of purchasers of fine monuments and today there is a bigger demand for it than for any other kind of gray granite.

Genuine Barre granite has a distinctive grain or mottle which enables anyone familiar with the different granites to quickly distinguish it from all other gray granites. Go into any cemetery in the United States and you will find that 80 to 90 per cent of the gray granite monuments are made of Barre granite. This fact alone should convince anyone of its superiority.

Six Points of Excellence

1. Barre granite is an extremely hard stone. It can be handled, worked, shipped and erected without danger of breakage. The delicate corners and edges of raised letters and carved decorations are not liable to be broken.

2. It has a beautiful, fine grained crystalline texture. There are a few gray granites that are finer grained, but they are not nearly so handsome, the smooth hammered or polished surfaces being practically of the same tone and lacking the snap and life of the rich mottled color of Barre granite. Another great advantage of the Barre granite is its great resistance to the action of the weather. The crystals are so compact that the stone will not crumble or wear away. Monuments of Barre granite erected forty to fifty years ago show not the slightest sign of wear.

3. It takes a very high polish. Barre granite can be dressed down and finished to a high mirror polish so deep and transparent as to resemble finely polished plate glass in its smoothness.

4. It can be hammered to a beautiful, smooth surface. Barre granite cannot be surpassed for the fine hammered designs that are so popular.

5. Its beautiful color will never fade. Both the rich bluish gray of the polished dark Barre and the grayish white of the hammered light Barre are permanent colors.

6. The unvarying uniformity of quality and color has been demonstrated and established beyond doubt. For about fifty years Barre granite has been quarried on a large scale and is invariably used for the finest monuments.

Barre granite is remarkably free from defects of any kind. Many other gray granites are almost worthless for monumental purposes because of sap, knots, streaks, spots and iron deposits. We guarantee our Barre granite monuments to be free from any of these defects.

Dark Barre for Polished Work

Barre granite is found in two shades—dark and light. The difference is due to the presence of a greater number of the small black crystals in the dark Barre granite. In the rough stock it is sometimes difficult for an inexperienced person to distinguish between the two varieties, but on a polished or hammered surface the difference is plainly seen. Dark Barre is more suitable for polished work, as the polishing brings out the full, deep, rich color and grain. Light Barre can be polished just as easily, but the scarcity of the small black crystals gives the surface a more nearly uniform color, lacking the life and contrast of the polished dark Barre. Sunken letters show up much better against the surrounding surface on polished dark Barre than they do on polished light Barre, For these reasons we use and recommend dark Barre granite for all monuments or parts of monuments having polished surfaces.

The polished surface of dark Barre granite wears longer and withstands the action of exposure better than any other gray granite quarried.

Light Barre for Hammered and for Rock Faced Work

Hammered finish light Barre monuments are very much in demand. The finish is smooth, but not polished. Some of the finest memorials made are in this finish and are much admired on account of the soft, quiet color effects and beautiful relief carvings. The lighter the color the more pleasing the effect on hammered surfaces and, as light Barre granite hammers out almost white, it is much better than dark Barre for this purpose.

Light Barre granite is used for rock face work because it makes a more striking appearance.

Special Designs on Request

We show a large assortment of stones in this catalog, but we will gladly figure on any special design desired. We make any alterations wanted in the stones shown here and we will assist you with such advice and information as we are able to give. If you have any questions to ask don't hesitate to write us. Our Monument Department is at your service.

Prices for Lettering on Granite Monuments

We make a specialty of fine lettering. We quote prices on the lettering separately, so that our customers may know exactly what they are paying for. All lettering is extra. See pages 80 and 81 for styles. We suggest that after reading our suggestions on pages 79, 80, 81, 82, 83 and 84 you write to us, giving the exact inscription you want on the stone. We will then lay it out for you, giving the proper sizes in which to have each part cut, and will submit this to you for your approval. This service is free and places you under no obligation to us.

Artistically Expressive of Unfinished Work

$301.70 AND UP

The partly executed dream of the sculptor suddenly stopped in the midst of its unfolding. One sees the artist, without warning, summoned to answer the last call, leaving his uncompleted work to stand as a monument to his art. The main block is carved complete from a single piece of choice light Barre granite, and the finished portion is all fine hammered. The rest of the main block and all four sides of the base are rough rock faced. The quarry blocks are too regular and uniform in shape to give the proper effect, due to the fact that Barre granite is very fine grained and has a fairly straight cleavage and hence the surfaces must be chipped and pointed up.

The carved festoon above the name is raised 1 inch on the smallest size, 1¼ inches on the second size, 1½ inches on the third and fourth, and 2 inches on the fifth and sixth. The projection of the false upper base and cap from the face of the false main block is 2 inches, 2½ inches, 3 inches, 3 inches, 4 inches and 4½ inches, respectively, on the six sizes and the depth of the sunken panel on the false main block is, respectively, 1½ inches, 1¾ inches, 2 inches, 2 inches, 2½ inches and 2½ inches. For grave markers see 42M11950-6, 42M11960-6 and 42M11970-6 on page 26. Lettering not included in price. For styles and prices of lettering see pages 80 and 81. A selection of military verses and emblems will be found on pages 82 and 83. Fraternal emblems are shown on page 84 and a wide selection of epitaphs will be found on page 79.

Solid Substantial Rock Faced Monument

$233.10 AND UP

This beautiful memorial is cut entirely from choice light Barre stock. The main block and base are all rock faced except the fine hammered oval panel and the raised oak and ivy leaves on the front of the main block. Barre granite is so fine grained that the cleavage is quite regular and to get this rock faced effect, shown in this and other designs, it is necessary to chip off pieces of the hard granite. This is very cleverly done, however, so that no tool marks show on the finished monument.

There is ample room on the panel for several ordinary inscriptions and the design is especially adapted for a family stone. The oak and ivy leaves are symbolical of the husband and wife, the heads of the family. The large stippled letters in the family name are very appropriate for rock faced designs. The size should range from 4 to 5½ inches. No lettering is included in the price of the stone. For grave markers to go with this monument see 42M11950-6, 42M11960-6 and 42M11970-6 on page 26. See inside back cover page of this book for freight rates to your state. For styles and prices of lettering see pages 80 and 81. An Artistic Monument Without Ornamentation

Beautiful in Its Extreme Simplicity.

$227.95 AND UP To those who prefer an entirely plain monument with no fancy decorations or carvings of any kind this memorial will command unusual admiration. This stone is perfectly plain, yet the artistic beauty and simplicity of its lines make it very attractive. The slight taper of both the main block and base and the low apex on top gives the stone a distinctively artistic appearance and adds greatly to its grace and beauty. Made of first quality light Barre granite, all fine hammered finish. The lettering shown is not included in the price of the stone. For grave markers to go with this monument see 42M11950-6 and 42M11960-6 on page 26. For styles and prices of lettering see pages 80 and 81. Made of light Barre granite. Fine hammered finish all over, producing as nearly white a finish as its light gray crystals will permit. Very attractive when family name is carved in round top hammered raised letters in center of main block. If complete inscriptions are preferred, these may be carved instead in the V sunk or the raised letters, either of which will be in harmony with this simple design. Lettering is not included in price of stone. For styles and prices of lettering see pages 80 and 81. A selection of military verses and emblems will be found on pages 82 and 83. Fraternal emblems are shown on page 84 and a wide selection of epitaphs will be found on page 79.

Dark Barre Granite Monument With Light Barre Base.

$187.10 AND UP

The roll is turned out of a solid piece of choice dark Barre granite in a huge lathe and then polished all around. The two bands of vine tracing run up over the front, top and back. The ends of the roll are rock faced. The dark Barre main block is mirror polished front and back, with neat tracings in the upper corners of the front, and the ends are rock faced. The base is rock faced on all four sides and is made of first quality light Barre stock.

There is plenty of room on the main block for several ordinary inscriptions in sunken letters if desired. The name shown on the roll is not included in the price of the stone. For styles and prices of lettering see pages 80 and 81. A selection of military verses and emblems will be found on pages 82 and 83. Fraternal emblems are shown on page 84 and a wide selection of epitaphs will be found on page 79.

The main block and base are all rock faced except the fine hammered finish name panel on the front of the main block and the raised carving. The huge blocks of granite as they come from the quarry are more regular and uniform than the illustration shows, but they are cleverly chipped and shaped to give them the rough, rocky effect. The delicate vine carving on the main block is raised in low relief. The name shown is not included in the price of the stone. For styles and prices of lettering see pages 80 and 81. Gentlemen:—I am just in receipt of a letter from my brother, John P. Keeton, Pearl, Texas, in which he states that he has just erected the monument at my little girl's grave. He says: "Not a scratch or mar on it and by all odds the most beautiful in cemetery." Now, that is gratifying to me, and besides I saved at the lowest $105.00 by ordering from you. I want to thank you for the interest you have taken in the matter.

Kindly send me another catalog of your monuments.

Yours respectfully,

D. M. KEETON.

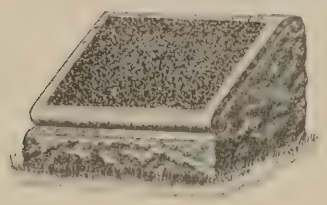
For Styles and Prices of Lettering See Pages 80 and 81.

Carved and Polished Dark Barre Granite Marker



This marker is cut from first quality dark Barre stock and is skillfully carved and shaped exactly as shown in the illustration. The bevel face is mirror polished to receive the name and dates of the inscription. The ends, back and vertical front surfaces are rough rock faced. The bottom is squared off for setting on concrete foundation, unless the marker is ordered with a stub or rough butt for ground setting. If the stub is wanted, we charge extra and the weight is double.

American Red Granite Monuments and Markers

American Red Granite has exceptional beauty and attractiveness. Its rich, pleasing appearance, its everlasting qualities, the contrast it presents when placed among other memorials, and its low cost, make it the choice of those who want a durable and beautiful memorial.

Unlike most red granites, it has a coarse grain, making the contrast between the polished and hammered, or rock faced, surfaces a marked feature of beauty. The color of the hammered surfaces has a delicate tinge of pink, much lighter than the polished surface or the rock face. One may stand at a considerable distance from an American Red Granite memorial and easily read the lettering, regardless as to whether it is traced, raised or sunken.

Not Affected by the Weather

American Red Granite will absorb only about one-tenth of one per cent of moisture, while many other kinds of granite will absorb from two to five times this amount of moisture. This means that American Red Granite is less liable to be injured from heat or frost, and will not fade or discolor when standing out in the open for years.

New Designs of Artistic Character and Beautiful Architecture

On the following pages is shown a large selection of appropriate monuments, tombstones and markers. These stones have been selected from the very latest designs and represent the careful efforts of some of the foremost designers.

Shipped From Granite Shops Near Chicago

American Red Granite memorials are finished, carved and polished in our granite shops near CHICAGO. This central location insures low freight charges and convenient shipping to almost any part of the country.

Special Designs

We show a large variety of designs in this catalog, but we will gladly advise you the cost of any special design you may desire. We make any alterations wanted in the stones shown here and we will always gladly assist you with such advice and information as you may require. If you have any questions at all to ask don't hesitate to write us, for our Monument Department is at your service.

Prices for Lettering on American Red Granite Monuments

We make a specialty of fine lettering. We quote prices on the lettering separately, so that our customers may know exactly what they are paying for. All lettering is extra. We suggest that after reading our suggestions on pages 79 to 84 you write to us, giving us the exact inscription you want on the stone. We will then lay it out for you, giving the proper sizes in which to have each part cut, and will submit this to you for your approval. This service is free and places you under no obligation to us.

We Guarantee Monuments Against Damage in Transit

All our monuments are strongly boxed and bound with steel straps and are guaranteed to reach destination safely, without scratch or mar of any kind. We take such great pains with the packing of the various parts of the monuments that there is but a small possibility of them becoming damaged while in shipment. However, if by any rare chance any part of any monument should be damaged in the least, we will replace it. All we ask is that you call the railroad agent's attention to the damage and have him make a notation on the freight receipt before you pay the charges. You can then send us this receipt with your report and we will duplicate the damaged part without any charge to you.

A Stately American Red Granite Monument

$426.60 AND UP

Admirably suited for a family plot. The work of an artist is readily recognized in this beautiful monument. The graceful lines add a richness of appearance that is to be found in few stones. Consists of three pieces—main block, upper base and bottom base. The main block is polished on all four sides, with the apex top fine hammered finish. The upper base is also polished on all four sides and the lower base is all hammered. The Old English initial on the upper part of the main piece is included in the price of the stone. Our Marble Monuments

WE OFFER our customers no new or unknown marble. The old tried and true Vermont marble needs no introduction or apology. It is the original tombstone material of this country. The very first settlers of the New England colonies brought over slabs of Welsh slate for their humble monuments; but the first native stone to be used was marble from the Vermont hills. And many of the original white marble slabs, dated considerably over a hundred years ago, are still standing in good condition in parts of New England, with their quaint inscriptions perfectly readable.

Our Shops Are at the Quarries

Our marble shops are located in the city of Rutland, in the heart of the Vermont marble district. Without question there is no better quality of marble produced in the United States for monuments than comes from the state of Vermont.

Immense Piles of Marble Blocks Ready for the Sawmills. This is selected stock from which our monuments are made.

Marble Carving by Experts

Most of the roughing out, surfacing, polishing, etc., of the marble is done by modern machinery. In our shops will be found a complete up to date equipment of machinery, tools and devices for producing the best kind of work.

The finer and more difficult carving is done by hand, and this work is executed by men of exceptional artistic talent who have spent the greater part of their lives in the profession as expert marble carvers. The workmanship on every stone is guaranteed perfect beyond question.

Polishing and Lettering

Polishing is done largely by machinery, but many small and irregular surfaces are still polished by the slow, careful hand rubbing process. All polished surfaces are given a very high gloss to bring out the color and veining of the marble.

Lettering is done both with air tools and by hand. We make a specialty of fine lettering and take great pride in the extreme accuracy and neatness with which this part of the work is done. In every case we send a typewritten copy of the inscription back to our customers so they can go over it to see that it is correct before we forward it to the shops. After the lettering has been laid out on the stone, it is very carefully spelled out and checked by the foreman before a single letter is cut. It is also rechecked after it is finished. A mistake in lettering is a very rare occurrence.

An extra charge is made for lettering, except when otherwise stated. Illustrations and prices of different styles of lettering are given on pages 80 and 81. A selection of military verses and emblems will be found on pages 82 and 83. Fraternal emblems are shown on page 84 and a wide selection of epitaphs will be found on page 79.

Blue Dark Vein Marble

Our Blue Dark Vein Marble is a hard, compact calcareous stone with a beautiful rich dark blue veining. The ground or body varies from a medium gray to a deep dark blue, and there is no regularity in the shading or veining. It is all beautiful and is used just as it comes from the quarry, with no sorting for color. It is famous for the fineness of its texture, the beauty of its color and the strong contrast between polished and cut surfaces, which makes lettering show up better on this marble than on any other kind. It is far superior to the Southern marbles quarried in Georgia and Tennessee, for they are coarse in texture, mottled in color and are not adapted for plain readable inscriptions. There is no dark marble quarried anywhere that surpasses our Blue Dark Vein for monumental use. It withstands exposure to the weather for many years.

We strongly recommend our Blue Dark Vein Marble for all monuments having ornamental tracings, as the delicate designs will show up much better than on the white marble. The blue marble takes a very high polish, and it is on the polished surfaces that the beautiful color and veining is brought out. The bottom bases are left in the sand rubbed finish and appear lighter in the illustrations of the blue marble stones. Our Blue Dark Vein Marble is exactly the same in quality as our White Clouded Rutland Marble, the difference in price being due entirely to the relative scarcity of the white marble. We will be glad to send a small polished sample for 15 cents.

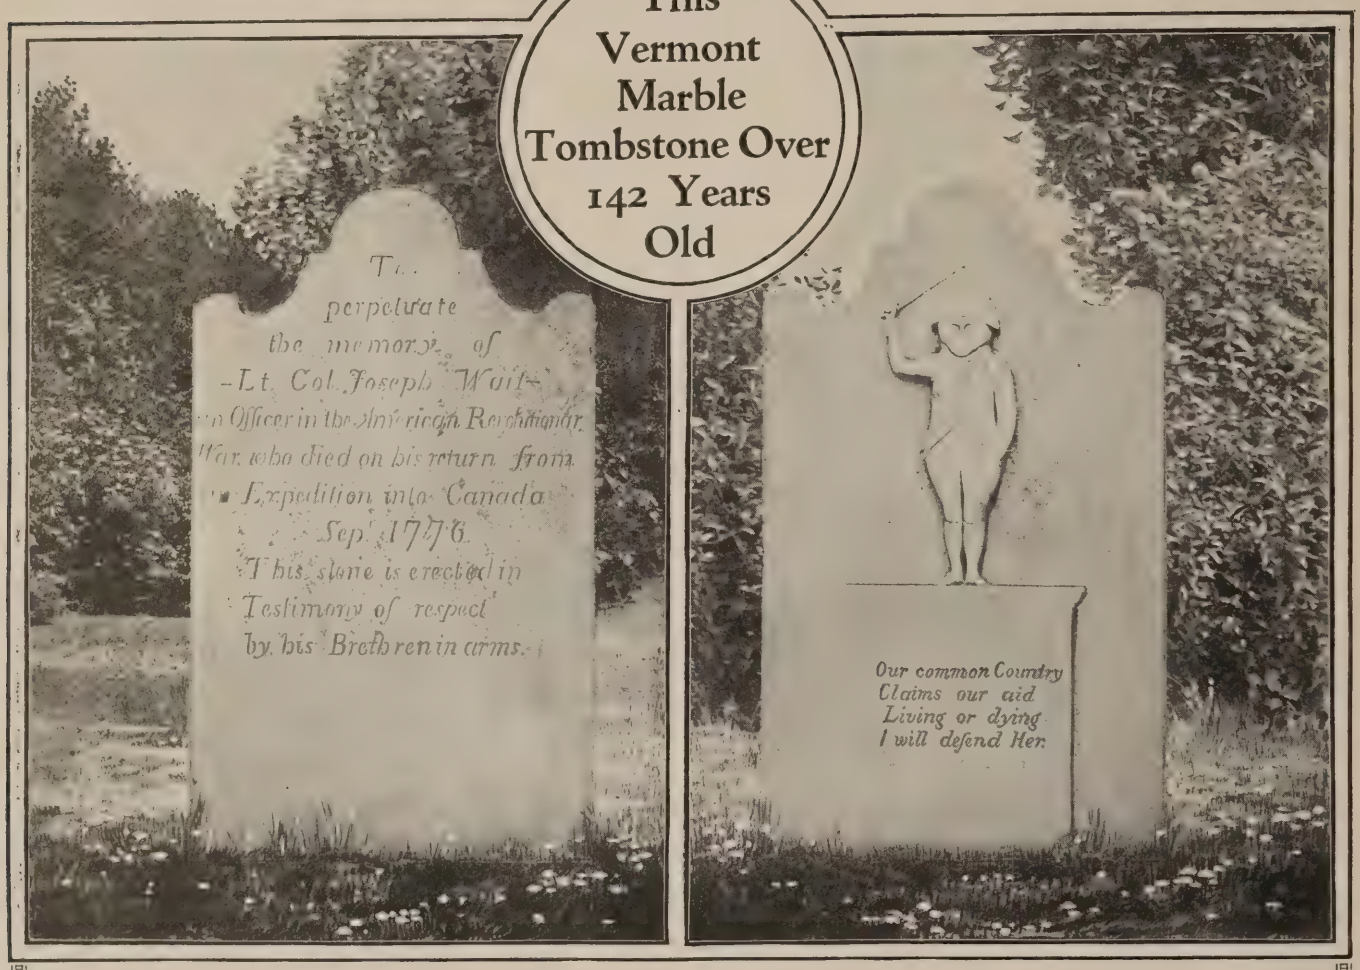
This Vermont Marble Tombstone Over 142 Years Old



White Clouded Rutland Marble.

THIS quaint old tombstone is practically as good today as when erected more than 142 years ago. A few miles from the city of Rutland, Vt., this quaint old marble slab still stands to mark the grave of an officer in the Revolutionary Army. After all these years the lettering is still clear and legible, practically as plain today as when first made, although not cut nearly as deep or as sharp as our inscriptions now are. Illustrations show both sides of stone. The stone is a good example of the wearing qualities of Vermont Marble. Our Marble Tombstones are made of this marble, taken from the same district.

Our White Clouded Rutland Marble is of the same high quality as our Blue Dark Vein Marble, the only difference being in color. It is quarried from the same hills and from veins and strata lying adjacent to the blue marble, but is not so plentiful, and therefore a little higher in price. It is a very hard stone of exceedingly fine grained texture and practically pure white. There are occasional small veins of color running through the marble, however, and in order not to misrepresent it we call it all "white clouded." Some of our monuments are made of pure white blocks with no veins at all, but the marble is used just as it comes from the quarry, without sorting for color, and therefore we can never guarantee to furnish a pure white stone. At all times, however, the veining is subdued.

Our White Clouded Rutland Marble is harder than the famous imported white Carrara marble of Italy and will last longer when exposed to the weather. There is no other white marble quarried in this country suitable for monuments except that from one small quarry in Colorado. The so called white marble of Georgia is really gray, and all other "white" marbles are too heavily veined and mottled to make good monuments.

We recommend our White Clouded Rutland Marble especially for carved designs, or for any monument intended for the grave of a child or young lady—for any place where a fine white memorial is suitable. We will be glad to send a small polished sample for 15 cents.

Limoges Imperishable Porcelain Portraits for Setting in Monuments

This illustration shows the full size of the smallest portrait.

THE use of a portrait on a monument or tombstone appeals to many. It is really an ancient custom, for on the old tombs of Egypt and Rome will be found carved portraits of the deceased along with an inscription telling the history of the person buried there. But whether we place a picture of the departed on the monument today as an aid to the identification of the spot, or for the purpose of keeping fresh in the memory the face and features of a loved one gone before, the custom is a good one.

For years, in fact, ever since photography has been perfected, photographic portraits have been attached to tombstones in many ways. The photograph behind a piece of glass, held in place with putty, was more or less common a few years ago, but this method was inadequate. Moisture inevitably penetrated behind the glass and spoiled the picture. Even when the difficulty of keeping the moisture out was overcome, the steady direct light of the sun faded the picture in a very short time.

The problem has now been solved. The photographic portrait, instead of being made on paper and protected behind glass, is made on porcelain and is unaffected chemically or physically by any of the elements of the atmosphere. The heat of the sun, the cold of the Winter's snow, the moisture from rains and dews, the steady exposure to strong light have no effect on this portrait. We are glad to be able to offer our customers a portrait that we can guarantee to be imperishable.

Our Imperishable Portraits are made on a base of copper coated on both sides with pure white porcelain, burned in a kiln at a very high temperature. They are oval in shape and convex. The front or convex surface is then sensitized and the picture is photographically transferred to the porcelain surface and made permanent by the latest photographic processes. It is then burned in by being put through the kiln again. A final coat of clear transparent porcelain is then applied and the portrait goes into the kiln another time.

We reproduce any photograph. Of course, the better the copy we have to work from, the better portrait we can make. Oftentimes our porcelain portrait is much superior to the original picture. We cannot guarantee, however, to always improve on the original, and we suggest that the best and most lifelike portrait obtainable be sent us. We will always guarantee to make an exact reproduction of the face and can assure satisfaction in every case where the picture sent us was itself a satisfactory likeness.

We can make minor changes in the portraits, such as straightening neckties or removing surrounding figures in a group, but we prefer to make no changes in the heads or faces, for no matter how skillfully the work may be done, the likeness is very easily spoiled.

We set our Imperishable Porcelain Portraits in any of our monuments, ordered at the same time, either marble or granite, before shipping and guarantee them to stay in place. The narrow white margin at the edge of the portrait is covered by the cement which holds it in position, and hence the exposed portion is slightly smaller than the dimensions given below. We cut an oval recess in the monument with undercut edges, and the cement holds the portrait so firmly in place that it becomes practically a part of the stone itself.

After the Porcelain Portrait has been made and set we will return uninjured all pictures sent us. Always allow us about a week longer on any order with a portrait. Mark your picture plainly "For Monument Department."

After a bad fire at our marble shops we found three Porcelain Portraits where the heat had been most intense. They were not injured in the least, although the marble monuments in which they had been set had crumbled and fallen to pieces.

Imported Marble Statue for Child's Grave

Statue of White Carrara Marble. Pedestal and Bases Made of Rutland Vermont Marble or Light Barre Granite.

Beautiful cherub with bowed head and clasped hands. Symbolic of childish innocence. A most appropriate memorial for a child's grave.

The statue part of this memorial is imported from Italy. It is carved from one solid block of genuine Carrara marble. This marble, quarried in the famous Carrara district of Italy, is noted the world over for its exceedingly fine grained texture.

There is no better sculpturing marble to be found anywhere. It is but natural that the Italian natives of old Carrara should excel in working and sculpturing this beautiful marble which is found in such abundance at their very door. They have specialized all their lives in working this particular stone.

Some of the greatest masterpieces have been produced in this district and carved from this marble. The finest works of such noted artists as Michelangelo and Canova were executed in Carrara marble. Thousands of beautiful statues are exported every year from Carrara to all parts of the world for the simple reason that neither the beautiful material nor the fine artistic workmanship can be duplicated elsewhere.

We offer this imported Carrara Marble Statue mounted on pedestal and bases of Blue Dark Vein Marble, White Clouded Rutland Marble or Light Barre Granite.

Statue is assembled and fitted to pedestal and base parts at our shops in Vermont before shipment to you so as to insure correct setting. Shipment consisting of four parts, statue, pedestal, upper base and lower base is forwarded to you in one consignment, all finished, lettered and ready to set up.

Lettering is not included in prices quoted. For styles and prices of lettering see pages 80 and 81. A selection of epitaphs will be found on page 79.

If in marble, pedestal and upper base will be polished on four sides and the lower base will have sand rubbed finish on all sides.

If light Barre granite is specified for these parts, they will all have fine hammered finish on all sides (not polished).

We guarantee safe delivery to any freight station.

Imported Marble Statue for Adult's Grave

"The Recording Angel" statue of this memorial is imported from Italy. It is carved from a single block of the same genuine Carrara marble described on the opposite page.

The pure lilylike whiteness of this marble makes it beautifully adapted for the subject of this statue.

A memorial of character and refinement that will appeal to all. It will add dignity and beauty to the entire surroundings and will make your burial lot a center of attraction and admiration.

Ordinarily, imported statuary is sold at such high prices that it is beyond the means of the average purchaser. The special arrangement that we have made for the importation of these genuine Carrara marble statues, however, permits us to offer these beautiful memorials at fair and reasonable prices.

The statue alone is 4 feet high. It is beautifully finished and very lifelike. The angel is in the act of inscribing a record in the Book of Life with the quill held in the right hand. The illustration here was made from a photograph and correctly shows the statue as it really appears. Note the feathers in the wings, the folds of the garment, the hair and the features of the face—all carefully brought out to the minutest detail by the master hand of the sculptor.

We offer this imported Carrara marble statue mounted on pedestal and base of Blue Dark Vein Marble, White Clouded Rutland Marble or Light Barre Granite.

Statue is assembled and fitted to pedestal and base part at our shops in Vermont before shipment to you, so as to insure correct setting. Shipment, consisting of three parts, statue, pedestal and base, is forwarded to you in one consignment, all finished, lettered and ready to set up.

Lettering is not included in prices quoted. For styles and prices of lettering see pages 80 and 81. A selection of epitaphs will be found on page 79.

Send us a copy of the inscription you want and tell us which selection of stone you have made for the pedestal and base. We will send you an estimate and sketch showing lettering laid out to make the best appearance, and will quote our price for memorial complete, made up and lettered just the way you want it, and including all freight charges prepaid to your station.

This service is free to you and places you under no obligation to buy.

If in marble, pedestal will be polished on four sides and the base will have sand rubbed finish on all sides.

If light Barre granite is specified for these parts, they will both have fine hammered finish on all sides (not polished).

We guarantee safe delivery to any freight station. For freight rates see inside back cover page.

Marble Military Memorial

$66.50 AND UP Beautiful marble memorial with impressive military design traced on polished front of stone and traced garland design at each end as shown. The artistic appearance of this stone with its broad graceful outlines will appeal to the most refined taste. The low setting of the stone gives the inscription a place of greatest prominence so that it is more often and more easily read. A very appropriate design for a military memorial. This monument is furnished in three sizes and may be had either in Blue Dark Vein or White Clouded Rutland Marble. If stone is not wanted as a military memorial we will furnish it with any particular traced design emblem or monogram desired on front, instead of military design shown. Front of stone is highly polished, all other exposed surfaces have sand rubbed finish. Lettering shown is not included in prices quoted. For styles and prices of lettering see pages 80 and 81. Artistic Churchyard Slab

$36.95 AND UP

The quaint old "churchyard slab" style of monument possesses a certain element of charm and simplicity which gives it a warm spot in the hearts of all. This style of stone, after many centuries, still retains its hold and is growing more and more into popular favor. The stone illustrated is an exceptionally beautiful example of the type. It is a highly appropriate stone for a military memorial. The modern traced design suggests a contrast which cannot help but invite admiration. Prices quoted include entire traced design as shown. The particular traced design illustrated is symbolic of the aviation service, but any other traced military or fraternal emblem may be substituted, if desired, at the same price. Lettering is not included. For styles and prices of lettering see pages 80 and 81. A selection of military verses and emblems will be found on pages 82 and 83. Fraternal emblems are shown on page 84 and a wide selection of epitaphs will be found on page 79.

Both of the tombstones shown at the top of this page are designs that have been in demand for a number of years. There is hardly a cemetery but what contains one or more of this type of stone. The elaborate tracings, the highly polished surfaces of the main block and upper base and the sand rubbed finish of the lower base make a contrast that is both attractive and pleasing.

Double Monuments of Attractive Design

$74.00 AND UP

A much admired double memorial. There is ample room on the oval top for the words "Father" and "Mother" in any style of lettering desired. The traced leaf design, which appears on the front only, artistically divides the stone so that the inscriptions may be placed on the right and left half. The family name may be placed in raised letters at the bottom of the main block. The front, back, top and ends of the upper piece are polished. The base is fine sand finished. The lettering shown is not included in the price, but any lettering desired can be carved. For styles and prices of lettering see pages 80 and 81. Furnished in two sizes.

Total Height—3 feet 2 inches.
Main Block—2 feet 6 inches by 8 inches by 2 feet high.
Base—3 feet by 1 foot 2 inches by 1 foot 2 inches high.
Shipping weight, about 1,250 pounds.

A Family Monument of Rich Design

$80.60 AND UP This design is intended for family lots and can be used with or without small markers for the individual graves. If it is desired to put all the inscriptions on the large monument, there will be plenty of room. The modern way, however, is to put nothing but the family name in large raised letters on the upper base and all individual inscriptions are placed on small markers located at the various graves on the lot. We guarantee the material and workmanship. This is a monument you will be proud of and one that will add to the appearance of any cemetery.

MAIN BLOCK—Polished front, back and both ends. Top, fine sand rubbed finish. The tracing shown is on all four sides of the main block. If only one inscription is furnished, please indicate whether space is to be reserved for more later so that we may know how to place the lettering. For styles and prices of lettering see pages 80 and 81. A selection of military verses and emblems will be found on pages 82 and 83. Fraternal emblems are shown on page 84 and a wide selection of epitaphs will be found on page 79.

Exquisitely Refined White Clouded Marble Stone

$57.70

We offer this design in white clouded marble only, for in no other material could the refined character of this exquisite memorial be correctly expressed. This stone is especially suitable for the grave of a little girl or a young lady. The flowers are carved in relief and are a fine specimen of the sculptor's art. If desired, the roses can be changed to any other flower wanted. The name shown in the illustration in raised letters in full relief is given as an example only. It is not included in the price. There is plenty of room for any ordinary inscription in either raised or sunken letters. For styles and prices of lettering see pages 80 and 81. A wide selection of epitaphs will be found on page 79.

MAIN BLOCK—Polished back, sides and top. Front, including rose blossoms and stems, left in fine carved finish.
UPPER BASE—Polished front, back and sides. It is customary to place the family name in raised letters on the front of this piece.
LOWER BASE—Sand rubbed finish.

Total Height—2 feet 2 inches.
Main Block—1 foot by 5 inches by 1 foot 2 inches high.
Upper Base—1 foot 3 inches by 8 inches by 4 inches high.

Two Styles of Head Stones

Offered in Blue Dark Vein Marble Only

$5.65 AND UP

These head stones are suitable for any grave. The first size is small and is intended for infants' graves, but can be used any place where a first class stone is desired at the least possible expense. The larger sizes are appropriate for either children's or adults' graves. The quality of marble and the class of workmanship on these markers are just as fine as on our highest priced monuments. Note carefully the dimensions printed below and select the size you think will look best. For styles and prices of lettering see pages 80 and 81. A selection of military verses and emblems will be found on pages 82 and 83. Fraternal emblems are shown on page 84 and a wide selection of epitaphs will be found on page 79. Shipped direct from marble shops in VERMONT. See inside back cover page for freight rates to a few points in your state.

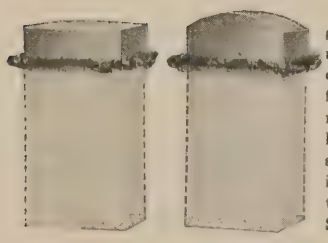
Marble Foot Stones



Foot stones to set at the foot of the grave are never included with our monuments unless ordered. The use of a foot stone is an old custom still followed by many, but some cemeteries now forbid them, permitting only a head stone to be erected. Our foot stones are sand rubbed finish and come in either blue or white clouded marble to match the head stone. Give color. Shipping weights, about 30 and 60 lbs.

42M10010—Flat top, 6x2 inches. Price, each..... **$1.00**

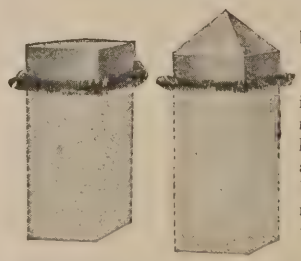
42M10012—Flat top, 8x3 inches. Price, each..... **1.80**
42M10013—Round top, 8x3 inches. Price, each..... **2.15**

All foot stones are about 16 inches deep.

Marble Corner Stones



It certainly helps to set off a cemetery lot to provide it with marble corner stones.

Corner stones should be set with 4 to 6 inches showing above ground. Either raised or sunken letters and figures can be had. See pages 80 and 81. All corner stones are sand rubbed finish and come in either blue or white clouded marble to match the monuments. Give color. Shipping weights, about 30 and 90 pounds.

Individual Grave Copings or Marble Cradles

$13.85 AND UP

In many localities it is customary to use individual grave copings or marble cradles, as they are called. The one shown here is plain in design and will match any monument or tombstone. We make it in five sizes. Coping consists of three pieces, two sides and one foot piece. It is always made in fine sand rubbed finish and comes in either blue or white clouded marble, to suit the monument you order with it. Dowel pins are furnished for joining the sides to the foot and also to the base of the monument. Do not select a cradle wider than the base of the monument or you will not be able to join them properly. For styles and prices of lettering see pages 80 and 81. A Convenient Collection of Quotations and Verses for Epitaphs

IF YOU have no special quotation or verse of your own, you will find in the following list one that will be appropriate. The use of a quotation or verse in an epitaph is a common custom and a beautiful one. In no other way can the tender sentiment of grief and sorrow be so fittingly expressed. We caution you not to confuse these two prices. It costs much more to cut letters in the hard granite surfaces than it does in marble. Prices are for verse letters on marble stones and 1-inch or under V sunk letters on Barre granite stones.

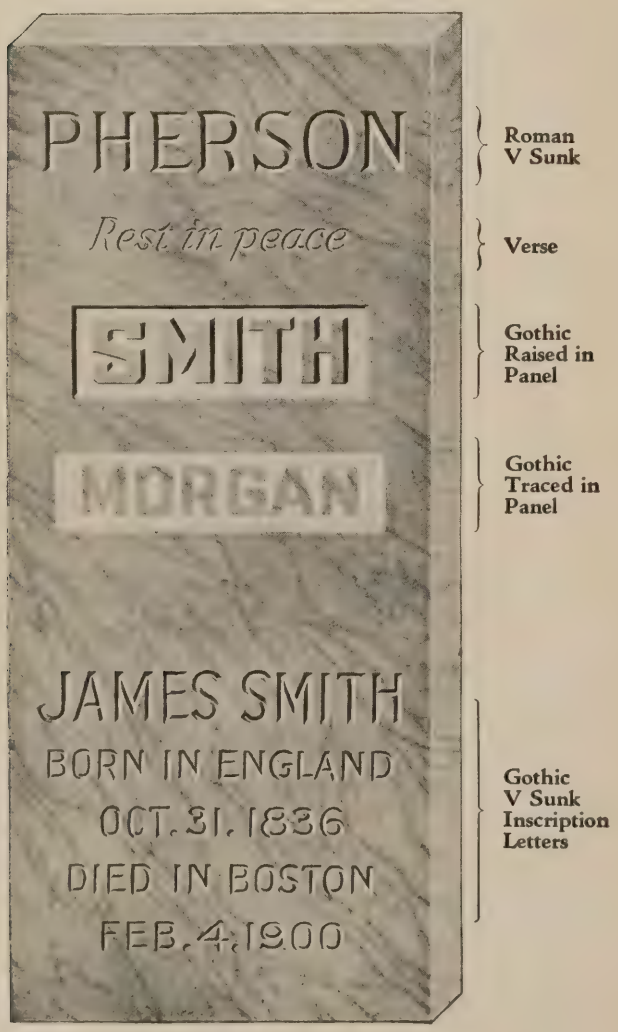
Lettering Costs Extra—How to Figure the Cost

AFTER you have determined from the foregoing pages the style and size of monument or gravestone you wish, it is necessary to compose and work out the lettering. With the help of the information given on pages 79, 82, 83 and 84, with reference to inscriptions, verses and emblems, it will be easy to decide what lettering should go on the stone. But then the question of the sizes and styles of lettering to give the best appearance must be decided.

On this and the next page we give illustrations of a number of styles of lettering for both marble and granite, with the prices. Most of the stones illustrated in this catalog are shown with the most appropriate style of lettering. The *style* is a matter of taste, but the best *size* letter to order should be left to our experts, who will correctly proportion the size of the letters for you so as to get the most artistic effect.

Our Tombstone Department is entirely at your service in this matter of lettering, as well as in all other matters relating to monuments and tombstones. We will gladly answer any questions you may wish to ask and give you any figures you desire. This service is free. You will be under no obligation to buy a monument from us.

To get the exact cost of the lettering you have selected, write to our Tombstone Department and give us the catalog number, size and style of the monument you like best and send a full copy of the lettering you wish to have on it. If you are not certain what styles of lettering would look best on the stone, you may leave both styles and sizes to us. We will then send you a typewritten copy, designating what sizes and styles of letters will be most appropriate for all the lettering. If you give us the styles and kinds of lettering you wish, we will give you the proper placing and the sizes that will be best.



Prices for Lettering on Marble Stones

We illustrate at the left the kinds of letters commonly used for marble monuments. The V sunk inscription letters are cut into the stone to a depth of one-half the width of the bars of the letters. On the smaller stones it is seldom practicable to use as large a letter as 1½ inches, and as the price is the same for any size up to 1½ inches, we prefer in all such cases to leave the exact size to the artist at the shops. He will always use the size best suited to the space.

The verse letters are small and shallow and should only be used for verses or quotations. See page 79 for a list of suitable verses.

The raised letters are used for family names on the upper bases of monuments, but on the larger stones the entire inscription can be cut in raised letters if preferred.

Prices on Gothic Letters

Prices on Other Styles

Verse letters, see second line from top in illustration. Price, each letter, 6 cents.

Roman and Headed or Block letters, as shown in the name Terrell on the opposite page, one-half more than Gothic.

Square Sunk, same prices as raised.

Gilded or Blackened Sunk letters, double regular prices; gold leaf, triple regular prices.

Old English, Hebrew, Greek, etc., double regular prices.

Traced letters, 1½ inches or under, 30 cents each. See page 85 for meaning and description of "Traced."

Dashes and figures, same as letters; periods and commas, no charge.

A Few Pointers on Lettering

A WELL lettered monument is a work of art. Not only must the style of the letters be right, but the entire inscription must be properly worded and correctly located. One common fault with small marble stones is that too much lettering is crowded on to them. In ordering a small stone be careful to make the inscription as short as possible. If too much lettering is demanded, the letters must be cut very small, and the inscription is not only crowded, but is not easily read.

We advise placing the family name in large raised letters on the base or upper base of all monuments where space is provided for it. This large name makes it easy for your friends to locate your monument, even from a distance.

Don't order verse letters for the entire inscription on marble stones. These letters are small and shallow and should be used only for verses and quotations. The main inscription should always be cut in V sunk inscription letters or in raised letters. We do not cut verse letters in granite because they do not show up well. If you want a verse or quotation on a granite stone, it must be cut in V sunk letters, the same as used for the name and dates.

Standard Forms of Inscriptions

For the guidance of our customers who may not be familiar with the proper arrangement to use we give below a few of the standard forms.

1. A very common form for grown persons:

JOHN SMITH
BORN JAN. 24 1879
DIED JULY 8 1917

2. A simpler form, very often used, especially on granite stones where the lettering is hard to cut and therefore more expensive:

JOHN SMITH
1879-1917

3. Another form used for grown persons:

JOHN SMITH
DIED JULY 8 1917
AGED 38 YEARS

4. This form is the common one used for a wife. Her maiden name is used as well as that of her husband, this making identification complete:

MARY RUGGLES
WIFE OF
JOHN SMITH
BORN FEB. 18 1885
DIED OCT. 7 1916

5. Another form for the wife, making use of the French word "nee:"

MARY SMITH
NEE RUGGLES
1885-1916

6. The best arrangement where the husband and wife's inscriptions are on the same stone:

JOHN SMITH
1879-1917
MARY RUGGLES
HIS WIFE
1885-1916

7. The common form for a child's inscription:

HARRY R
SON OF
JOHN AND MARY SMITH
BORN APR. 3 1915
DIED MAY 12 1916

Prices for Lettering on Barre Granite Stones

We illustrate at the right the styles of letters commonly used for granite stones On page 80, under the head of "Prices for Lettering on Marble Stones," we explain how the V sunk inscription letters are cut. They are cut the same way in Barre granite. Verse letters are never cut in granite. Verses and quotations on granite stones must be in V sunk letters.

Quotations and Verses Suitable for Epitaphs on Military Memorials

THE following list of verses are especially suitable for epitaphs on military memorials. If you have not already decided upon some other verse of your own selection you may find one in this list that will please you. The custom of using a verse or quotation in an epitaph is a very old and beautiful one and has been popularly followed for many hundreds of years. On a military memorial this form of epitaph is especially appropriate. There is no other way to more fittingly express a beautiful tribute to the heroic death of the soldier. It costs much more to cut letters in the hard granite surfaces than it does in marble, as the work is much more difficult. This explains the very wide difference in the prices quoted below. Prices are for verse letters on Marble stones and 1-inch or smaller V sunk letters on Barre or American Red Granite stones.

Explanation of Terms.

When an emblem is traced, the outlines as shown are cut into surface of stone about 1/32 inch deep.

When carved, the emblem is cut so as to stand 1/8 inch high in sunken circular panel. If traced emblem is ordered, state if wanted inside a traced circle, as shown, or if you want circle omitted.

Fraternal Emblems for Tombstones

We illustrate here only a few of the more popular emblems, but we are prepared to carve or trace on any of our monuments *any emblem you may want.* Send with your order a careful drawing of the design and we will advise you what the cost will be. Traced emblems are simply cut to a depth of about 1/32-inch on the polished surfaces. They show up very nicely and will last on marble as long as the polish remains. On granite a traced emblem will practically never wear off. A carved emblem stands out from a circular sunk panel cut into the stone to a depth of 1/8 inch.

Packing and Shipping

The different parts of your monument will be carefully boxed or crated before leaving our shops. We guarantee every shipment against damage in transit. With every marble monument we pack enough stainless cement for joining the parts, and for the smaller stones we send dowel pins besides.

Careful Inspection

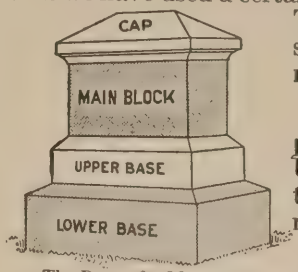
A rigid system of inspection is maintained in our shops to prevent any possibility of a defective stone being shipped to our customers. Each block of marble is examined closely and if it is unsound or shows flaws of any nature, it is promptly rejected before any work is done on it. Even after the carving, polishing and rubbing have been done, if a flaw or unsound spot is discovered, the piece is discarded at once and the work is done all over again. We do not permit anything but perfect pieces to go into the construction of our monuments. All bases are made of the same material as is used for the upper parts of the stone unless otherwise stated. The bases are not polished and for that reason appear lighter in the illustrations.

Special Designs

We will figure on special designs when complete specifications are furnished. We will also make any alterations you may wish in our regular designs. Our desire is to please our customers to the last detail, and our Monument Department will assist you in making your plans and help you in any way possible. If you have any questions whatever to ask, let us hear from you.

Technical Terms

We have avoided technical or trade terms as far as possible in this catalog, yet there are some that are so strongly connected with the stone working industry, and express the idea better than any other single words, that we have used a certain few. We explain these here.



The Parts of a Monument.

The illustration at the left shows the parts of a stone mentioned in our descriptions.

MAIN BLOCK—The main piece or block of a monument. Usually the piece that bears the inscription. The piece next above the bases.

DOWEL PIN—A short piece of rod or pipe made of a non-corrosive metal, or of iron, galvanized, and used in small marble monuments for strengthening the joints between the pieces. Holes are already drilled in the marble and the pin is set into the holes and made tight with cement.

Car Partly Loaded With Finished Monuments.

CHAMFERED—Beveled. Used in describing the sloped finish often given to sharp corners or edges.

TRACED—Cut very shallow. A traced design or letter is put on a polished surface only and the polishing is chiseled off to a depth of about 1-32 inch. While not as lasting or permanent as a design or letter that is carved into the stone, it retains its fine appearance for very many years.

WASH CUT—The beveled top edges of the bases. The top surfaces of the bases that project beyond the upper blocks are usually cut with a pitch or slope so that water will not stand on them.

Perrysburg, N. Y., Dec. 3, 1918.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen: I received word November 30th that the monument and other stones were at the railroad station, so got them and placed the monument yesterday. Had the foundation made some time ago. The monument fitted the foundation perfectly. Am pleased with it. Found it exactly as represented. Friends that have seen it think the workmanship and quality of material excellent and equal to many they have seen that cost much more at other places. They say it is indeed a very pretty and appropriate design of remembrance.

Thanking you for your kindness, and will aiso recommend you to my friends if they should be in need of anything in this line, I remain

Yours truly,
GLEN WELLS,
R. F. D. 1.

Rusk, Texas, March 27, 1919.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen: The gravestone I ordered from you received O. K. and am highly pleased with it. I saved 33⅓ per cent, one-third less than I would have paid local agents for stone of same weight and got one far superior in appearance. It would be an ornament in any cemetery. You can use this statement in any way you like.

Yours truly,
J. F. EVANS,
R. 2, Box 86.

Nicholsville, Ala., Feb. 26, 1919.

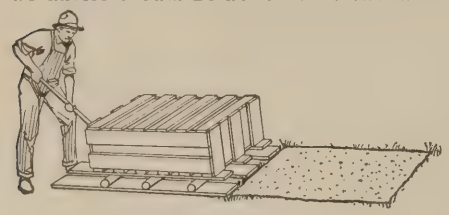
Gentlemen: I received the tombstone. It gives great satisfaction. The lettering is all right. I am well pleased with it.

Yours truly,
MRS. KATIE WHEASLEY.

Directions for Setting Tombstones and Monuments

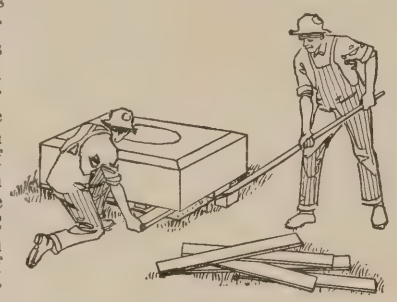
How to Set Small Marble Tombstones

It is necessary to build a foundation for a tombstone of any size, except the very smallest, and the sort of foundation we advise should be built about two weeks before the stone is set so that the concrete or cement may have time to set hard.



Moving the Stone on Rollers.

Dig a pit at the head of the grave about an inch longer and wider than the base of the tombstone. The measurements of the base are given in this catalog. The depth of the pit should be from 3 feet to 5 feet, according to the weight of the monument. Now fill in the pit to about the surface of the ground, as follows: First, lay a layer of stone or broken pieces of brick or gravel, then a layer of cement mixed four shovels of sand to one shovel cement. Then comes another layer of broken stone and then cement mixture. These layers can be from 8 to 12 inches deep. When you reach to about 1 foot of the surface put in a layer of cement mixed three shovels of sand to one shovel of cement. This will give a solid foundation which will prevent the stone from leaning. We might also suggest a solid concrete foundation. See that the surface of the foundation is perfectly level.

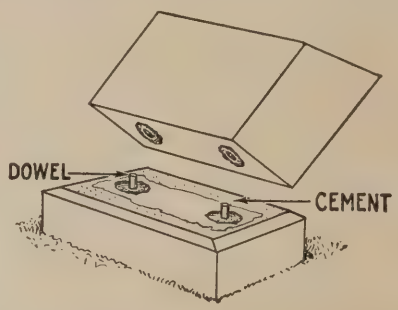


Always Have a Block Between Crowbar and Stone.

When the shipment arrives at the depot, be sure to examine it carefully for any damage. It is seldom that anything happens to a monument shipment, but if the stone has been chipped or scratched, be sure to have the agent make a notation of it on the freight bill and send this to us, describing the extent of the damage. Each part of the tombstone will be heavily crated. This crating should be left on until the grave is reached and you are ready to set. When removing the crates be careful that your tools do not strike and scratch the stone.

When ready to set stone, mix some Portland cement with sand for the joint between the foundation and base of the stone. Spread this over the foundation. Now place the base in position. The smaller stones are easily lifted by one or more men. Wipe off all surplus cement that spreads out of the joint before it sets.

The above directions apply to a monument with more than one piece as well as to a one-piece stone. With a stone of more than one piece you will find a small box of special cement packed in one of the crates. This cement is to be mixed with water to the consistency of paste. When the base stone is set, spread some of this cement around the edges of the top, also in the center. If dowels are to be used you will find holes already drilled for them and the dowels will be packed in one of the crates. The dowel holes in both the base and the next piece are to be filled with cement and the dowels placed in them. Be sure when you set the next piece in position that it is in perfect line with the base. Wipe off any cement that is squeezed out of the joint by the weight of the upper piece. Repeat these operations for each succeeding piece. After they are all set, go over the entire stone, removing any surplus cement.

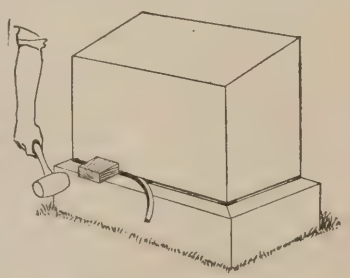


How Cement Is Spread and Dowels Placed.

How to Set Small Granite Tombstones

Lead Pellet on Each Corner.

Small granite markers and tombstones are set in the same manner as previously described for small marble tombstones, excepting that wedge lead is used in place of the cement. This lead will be found packed with one of the stones. After the base is set on the concrete foundation, take four pieces of wedge lead and pound them into pellets about the size and thickness of a 5-cent piece and place one on each corner of the base. When the next stone is set on the base there will be about an eighth of an inch joint still left between the two stones. Be sure you have the stones in perfect line as seen from all sides.



Pounding In the Wedge Lead.

Now cut off four strips of wedge lead the exact lengths of the joints between the pellets on all four sides of the stone. Place one of the strips in the open joint of the side it is cut to fit, sharp edge first. Then with a block of wood and a mallet pound the lead in so as to completely seal the joint. Never use an iron hammer, for with this there is great danger of chipping the stone.

Follow the same plan with the remaining three sides of the stones, thus sealing all the joints. The surplus lead can then be cut off with a pocket knife, as shown in the illustration. Finally to make the joints perfectly smooth and neat, again go over the lead with the block and mallet, which will fill in any crevices and smooth all irregularities.

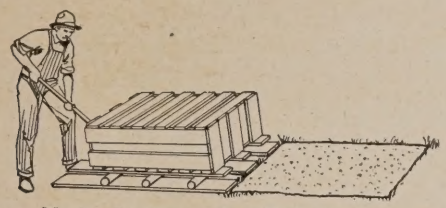
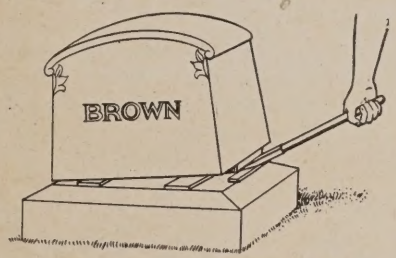
How to Erect Larger Marble and Granite Tombstones

The monuments are shipped knocked down. Each piece is heavily boxed and crated. If the distance from the depot to the cemetery lot is not too great you may be able to move each piece over on rollers, using crowbars to push. Remember



Moving Stone on Rollers With Crowbar.

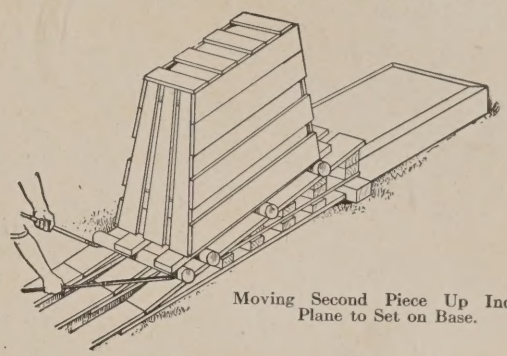
the crowbar should never be permitted to touch the stone. Always see that there is a block of wood, or at least a piece of crating, between the bar and the stone. If it is necessary to cart the stones to the cemetery, you will probably need a stone mason's derrick to lift the stones on and off the wagon. In any case leave the crating on the stones to protect them.



Always Place Wood Between Stone and Crowbar.

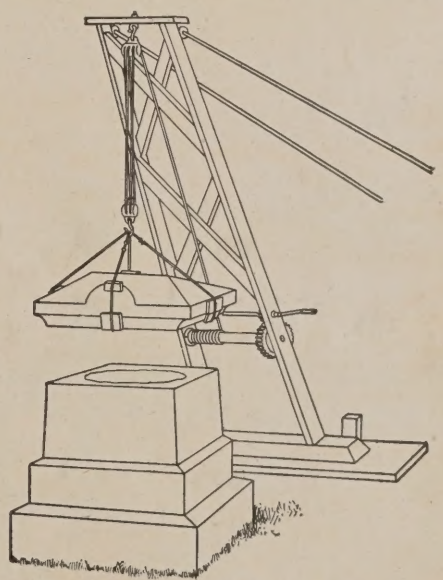
The foundation should be prepared the same as described on page 86 for small marble tombstones. When the lower base, or first stone, is brought up to the foundation, with the crating still on it, flush the foundation with a mixture of Portland cement and sand. If you wish, this flushing can be left until after you have the base in position and just before removing the underneath crating. Then with a crowbar lift one end. The pieces of crating on this end can then easily be pulled out. Repeat this to remove the crating on the other end. Be sure the stone rests level and parallel with the lot. The upper base, or next piece, should then be moved up on an inclined plane, if no derrick is being used. Place a small piece of wedge lead on each of the corners of the lower stone ready to receive the upper stone as soon as the crating is removed from it in the same manner as the crating was removed from the base. Be sure that a block of wood is always placed between your crowbar and the stone to prevent injury. Seal each joint with wedge lead, as explained on page 86, for small granite tombstones.

Pulling Out Underneath Crating.



Moving Second Piece Up Inclined Plane to Set on Base.

For a monument of more than two parts it is a good plan to use a derrick to put the upper pieces in position. Always place blocks of wood between the ropes and stones. However, a derrick is not absolutely necessary, for in nearly every case the whole monument can be set up simply with the use of timbers and rollers. An expert monument setter is not necessary, as any handy man who is careful can do just as good a job by following these directions.



Using a Small Derrick to Lift Stones.

If there is anything about the work that you do not understand we shall be glad to advise you.

Grave Lot Enclosures

We make a variety of styles of wire fabric fencing and wrought steel picket fencing, suitable for grave enclosures. The illustration shows our Greenwood Wire Fabric Fencing, which is made in several heights and is furnished complete with heavy tubular corner and gate posts, and top rail at a very low price.

This and other styles of ornamental fencing are shown in our special catalog of Lawn and Cemetery Fencing. Send for this catalog if you wish to enclose a grave lot, or a cemetery. Be sure to ask for special catalog of Lawn and Cemetery Fencing, because we also have a special book for Farm Fencing.

What Others Say

Gentlemen: The tombstone was received in good condition and am more than pleased. It is much better than I expected. A man told me that they asked him $250.00 for the same stone here. It cost me delivered not quite $89.00. I know that I saved more than half. Yours truly,

W. J. GARNER.
